Bellows suction cups VFX series 70

Suction cups made of G-FLEX material based on polyurethane which have the characteristic of having two different hardnesses: Lip softer to 30 shore, and then with a great prehensility even on products relatively difficult because of their porosity, such as paper and cardboard and bellows 60 shore conferring durability and responsive speed to the suction cup. The available fittings, there is the possibility to integrate a filter made of stainless steel and the check-valve to control vacuum flow.
